

THE NATIONAL ASSEMBLY OF SEYCHELLES

ANNUAL REPORT OF THE COMMITTEE ON GOVERNMENT ASSURANCES 2023

SEVENTH ASSEMBLY

Pursuant to its constitutional obligations, the Committee on Government Assurances, 7th Assembly, is pleased to present its Annual Report to the National Assembly for the year 2023. The committee members work collaboratively to address the issues at hand and contribute to the overall success of the committee's mission. The composition of the committee is as follows:

Hon. Sylvanne Lemiel
Chairperson

Hon. Nobert Loizeau
Vice Chairperson

Hon. DeSheila Bastienne
Member

Hon. Wallace Cosgrow
Member

Hon. Philip Monthy
Member

Hon. Rocky Uranie

INTRODUCTION

The purpose of the Committee on Government Assurances is to ensure that the promises and undertakings made by Ministers during Assembly sessions are fulfilled in a timely manner. Parliamentary Committee are established in accordance with Article 104 of the Constitution of the Republic of Seychelles with the aims to enhance the efficiency and effectiveness of the National Assembly in fulfilling its responsibilities.

The Committee on Government Assurances plays a crucial role within a democratic system, acting as a mechanism to ensure accountability and oversight of the government's commitments. The committee ensures that the assurances made by ministers are not merely political but are translated into tangible actions. They meticulously examine the implementation of these assurances.

The committee plays a crucial role in maintaining transparency and preventing any potential misuse of power by the government. It scrutinizes the progress made on each assurance, thoroughly assessing whether the government has taken adequate steps to fulfill its commitments. Moreover, the committee holds the power to summon ministers for inquiry, enabling them to elaborate on any delays or deviations from the committed plan of action. Ultimately, the Committee on Government Assurances serves as a custodian of the public interest, guaranteeing that the government remains answerable and attuned to the requirements and anticipations of its citizens. Through its diligent efforts, this committee contributes to the realization of good governance, transparency, and the efficient functioning of the National Assembly.

ACTIVITIES OF THE COMMITTEE FOR PERIOD UNDER REVIEW.

The committee's 13 meetings were conducted with the purpose of thoroughly discussing various activities that fell within the scope of the committee's mandate. These activities encompassed a wide range of topics and issues that required careful examination and deliberation. During these meetings, the committee members dedicated their time and expertise to scrutinize a total of 235 assurances. Each assurance was carefully reviewed and evaluated to ensure its compliance with the committee's standards and objectives. After thoughtful consideration and rigorous analysis, the committee determined that 155 of these assurances met the necessary criteria and were deemed suitable for adoption. This meticulous process ensured that only the most appropriate and reliable assurances were selected for implementation.

Moreover, the committee conducted field visits to diligently monitor the progress of numerous projects. One of these visits took place at the Island Development Company, where the committee inspected the projects on the enchanting islands of Desroches and Coetivy. The purpose of the visit was to investigate the progress of the projects pledged by Vice President Mr. Ahmed Afif and Mr. Savy in the National Assembly on October 5, 2021. There were two main projects that were being investigated, namely the Agricultural Production project on Desroches and the Shrimp Farming project on Coëtivy.

Besides that, the committee also paid a visit to the Inner Islands of Praslin and La Digue to closely oversee the implementation of diverse projects. It was imperative to conduct these field visits to guarantee that the projects were being carried out effectively and in adherence to the specified objectives and timelines.

By conducting these field visits, the committee ensured that the projects were not only meeting their specified objectives but were also benefiting the local communities and preserving the natural beauty of the Inner Islands. It allowed for direct oversight and allowed the committee to make any necessary adjustments or recommendations to ensure the successful completion of the projects.

In addition to their other activities, to ensure transparency and accountability in relation to the progress made on pledged projects, the committee organized a public hearing with the Minister for Youth, Sports, and Family Affairs and its technical team where they engaged in discussions to obtain verbal feedback, received updates, and acquire a deeper comprehension of the commitments made before the House. Members of the committee actively engaged in discussions, asking probing questions to ensure a thorough understanding of the commitments made. The public hearing served as a platform for transparency, as the committee sought to hold the Minister and their team accountable for the implementation of the pledged projects. The verbal feedback

obtained during the hearing helped the committee assess the effectiveness of the government's efforts and identify areas that required further attention or improvement. Overall, the public hearing played a crucial role in ensuring transparency, accountability, and public participation in the progress of the pledged projects.

Furthermore, to celebrate the significant milestone of Parliament's 30th anniversary, the Committee organized a remarkable outreach activity at the National Assembly on the 8th of September 2023. The primary aim of hosting this event was to educate and engage PSCE teachers from various school across the country, enabling them to gain a comprehensive understanding of the role and function of the legislature, while also highlighting the vital role played by COGA as a parliamentary committee.

The event began with an insightful presentation by the Committee on Government Affairs (COGA), shedding light on the role and function of the Parliament. This was followed by interactive sessions where teachers had the opportunity to engage with COGA members and ask questions about the legislative process and the committee's specific responsibilities. Additionally, the event featured informative presentation and guided tours of the National Assembly, allowing teachers to witness firsthand the inner workings of the legislature. The outreach activity proved to be a resounding success, as it not only enhanced the teachers' knowledge of parliamentary proceedings but also instilled in them a sense of appreciation for the important role of the Institutions.

It is important to mention that because of circumstances beyond the committee's control, two scheduled activities for the year 2023 had to be canceled and will be rescheduled for the upcoming year. It was a site visit to the Emergency House at Ile Aurore and a public hearing with the Ministry for Agriculture, Climate Change and Environment.

The table below provides a summary of the activities of the Committee.

Schedules of Meetings/Site Visits of the Committee on Government Assurances

Proposed Dates	Remarks
24th March	Committee Meeting
25th April	Adoption and Consideration of Assurances
9th May	Adoption and Consideration of Assurances
20th June	Committee Meeting
26th June	Committee Meeting
7th July	Committee Meeting
21st July	Public Hearing
11th August	Committee Meeting
8th September	Outreach Activity with PSCE Teachers
22nd September	Committee Meeting
20th October	Committee Meeting
17th November	Committee Meeting
7th December	Committee Meeting

Activities	Organisation	Dates
Field visits to outer island	Island Development Company	5th May
Field visits to ile Aurore Housing Estate MLH/220322/7PAR/1684-1691	Ministry for Lands and Housing	26th May CANCEL (TO BE RESCHEDULED)
Public Hearing	MYSFA	21st July
PUBLIC HEARING	MACCE	CANCEL
Field visit to Praslin/La Digue		29th/30th September
Visit Seychelles Broadcasting Corporation SBC/221122/7PAR/1847-1850		POSTPONED TO NEXT YEAR
Outreach Activity	PSE Teachers	8th September

COOPERATION WITH INTERNATIONAL ORGANIZATION

The committee recognizes the importance of staying up-to-date with global standards in oversight and accountability. By cooperating with international organizations, committee members can gain access to valuable resources such as research papers, case studies, and best practice guidelines. These resources can greatly enhance their understanding of effective scrutiny methods and enable them to effectively evaluate government assurances. Moreover, international experts can provide specialized training and mentorship to committee members, equipping them with the necessary skills and knowledge to perform their duties with precision and confidence. The committee's request for additional budget for 2024 demonstrates their commitment to investing in capacity building programs that will ultimately result in stronger oversight and accountability mechanisms within the government.

Cooperation with international organizations can provide valuable resources, expertise, and training opportunities that enhance the committee members' skills in scrutinizing government assurances. Capacity building programs may include workshops, seminars, and exchanges with experts from other countries, enabling members to better understand international best practices in oversight and accountability mechanisms.

ASSURANCES APPROVED BY THE COMMITTEE AND STATUS

The table below provides an overview of the number of assurances recorded, the number honored, and the number still ongoing within each entity.

Ministries/Departments/ Agencies	No. of assurances recorded	No. of Assurances Honored	No. of Assurances on-going
President Office	**4**	**4**	**0**
Vice President's Office	**2**	**1**	**1**
Ministry for Finance	**5**		**5**
Ministry for Fisheries	**3**		**3**
Ministry for Agriculture, Climate Change and Environment	**27**		**27**
Ministry for Transport	**17**	**2**	**15**
Ministry for Foreign Affairs and Tourism	**3**		**3**
Ministry for Health	**8**		**8**
Ministry for Investment Entrepreneurship and Industry	**0**	**0**	**0**
Ministry for Lands and Housing	**39**		**39**

Ministry of Youth, Sports and Family	**15**		**15**

Ministry for Local Development and Community Affairs	**0**	**0**	**0**
Ministry for Internal Affairs	**9**	**2**	**7**
Ministry for Education	**13**		**13**
Office of the Mayor of Victoria	**1**		**1**
Public Service Bureau	**1**		**1**
Seychelles Broadcasting Corporation	**4**		**4**
Seychelles National Heritage and the Arts	**1**		**1**

RECOMMENDATIONS OF THE COGA

The Committee's recommendations aim to enhance its oversight role, ensure effective monitoring of government projects and facilities, and promote transparency and accountability in government operations.

1. Visit to the Islands of Desroches and Coetivy:

The Committee recommends that a visit to the Islands of Desroches and Coetivy be conducted this year to further monitor the ongoing project and assess the development achieved thus far. This visit is crucial in ensuring that the project is progressing as planned and to address any issues or challenges that may have arisen since the last visit. The CEO's recommendation to revisit these islands aligns with the Committee's oversight responsibilities and commitment to ensuring accountability and transparency in government projects.

2. Visit to the Stadium at Amitie Praslin:

During the last field visit, the committee was unable to visit the Stadium at Amitie Praslin due to its occupation by a sports group. Therefore, the committee recommends scheduling a visit to the stadium in collaboration with the committee of MYCC (Ministry of Youth, Culture, and Community Development) to assess its condition and ensure that it meets the required standards. Additionally, the committee will partner with MYCC to visit all sports facilities to ascertain their state and address any concerns related to their maintenance and management.

3. Visit to The Emergency House at Ile Aurore:

The committee also recommends a visit to The Emergency House at Ile Aurore to evaluate its functionality and effectiveness in providing emergency services to residents. This visit will enable the committee to interact with relevant stakeholders to gather feedback on the services provided and identify areas for improvement.

4. Enhancing Communication and Providing Feedback:

The Committee emphasizes the importance of Ministries and other agencies enhancing communication and providing feedback on assurances made in the Assembly in a timely manner. This recommendation is crucial in enabling the Committee to exercise its oversight role effectively. Timely feedback and communication will facilitate transparency, accountability, and ensure that assurances made are followed through, ultimately benefiting the citizens of Seychelles.

CONCLUSION

The committee recognizes the importance of strong relationships and effective engagement with all Ministries, Departments, and Agencies (MDAs) in order to fulfill its oversight duties efficiently. In 2024, the committee plans to establish regular communication channels with the MDAs. By fostering open and transparent dialogue, the committee aims to gain a comprehensive understanding of the work being done by the MDAs, ensuring that they are operating in alignment with the committee's goals and objectives.

Moreover, the committee will actively seek input and feedback from the MDAs, valuing their expertise and insights to enhance its oversight activities. This collaborative approach will not only strengthen the committee's oversight capabilities but also foster a culture of cooperation and mutual respect between the committee and the MDAs. Through this fortified relationship, the committee anticipates a more effective and impactful execution of its oversight duties in 2024 and beyond.

The Committee has been faced with the challenge of a heavy workload, but we are grateful to have Secretarial support that is fully committed to staying updated. We wish to convey our sincere appreciation of their resolute commitment.

The dedication and support of the Speaker's office and its staff members have made the current year possible, and COGA would like to express its sincere gratitude to them.

The Committee would like to express gratitude and acknowledge the various Government departments for their open-door policy and willingness to share the challenges encountered during project implementation. This level of transparency enables us to pinpoint areas for improvement and strive towards discovering solutions that are advantageous to all parties involved.

Annex 1: Committee on Government Assurances- Amended Terms of Reference (2017)

The main functions of the Committee on Government Assurances is to scrutinize the assurances, promises and undertakings given by **The President, Ministers, Chief Executive Officers and Chairpersons of Boards** from time to time on the floor of the Assembly and to:-

1. Report on the extent to which such assurances have been implemented and where implemented whether such implementation has taken place within the minimum time necessary for the purpose.

2. Exercise such other functions that are not covered by paragraphs (a) above which may be allocated to the Committee by the Speaker from time to time.

REPORT ON COMMITTEE VISIT

Date: Friday 5th May, 2023

Time: 0900hrs onwards

Site: Deroches & Coetivy

Present

Committee on Government Assurances

Hon. Sylvanne Lemiel – *Chairperson*

Hon. Norbert Loizeau – *Vice Chairperson*

Hon. Philip Monthy

Hon. De Sheila Bastienne

Hon. Richard Labrosse

Hon. Rocky Uranie

Hon. Wallace Cosgrow **Absent with Apology**

Ms. Thelma Joseph – *Secretary*

Ms. Linda Gerry – *Secretary Assistant*

Mrs. Ghislaine Thelermont – *Secretary Assistant*

The IDC delegation that accompanied the members of COGA on their visit consisted of:

a) Mr. Glenny Savy (CEO);
b) Mr. Christian Lionnet (Deputy CEO);
c) Mr. Justin Moustache (Agricultural Project Manager); and
d) Mr. Michael Govinden (Public Relations Manager).

The respective Island Managers, Ms. Mariza Henriette (Desroches) and Mr. Gilbert Esparon (Coetivy) were also present for the visit.

1. Introduction

The Committee on Government Assurances, headed by its Chairperson, Hon. Sylvanne Lemiel conducted a site visit to Deroches and Coetivy on Friday 5th May 2023. The Committee investigated the progress of projects pledged by Vice President Afif and The CEO of IDC, Mr Glenny Savy in the National Assembly on the 05th October, 2021.

Deroches' Agricultural production and Coetivy's Shrimp farming were investigated.

2. Background

The Islands Development Company (IDC) is a parastatal company created by Government in 1980 and is registered under the Companies Act of 1972, with the mandate for the sustainable development of the outer islands. IDC's primary goal is to manage and administer the 14 islands that the Seychelles Government has leased to it for 99 years. IDC presently has permanent presence on twelve islands.

The Board of Directors directs IDC, creating policies and strategies to reach goals and fulfill social responsibilities. At present, it has one subsidiary and three associated companies. IDC operates its own aviation wing to better service the islands and is also co-owner of the vessel *Enterprise II,* which it manages.

Deroches

Desroches Island is the main island of the Amirantes Islands. It is located 227 km southwest of Victoria, Seychelles. It is 5.5 km long and has a land area of 4.027 km^2. Along its circumference of 13 km is beaches of fine sand.

Tourism is now the main economic activity, but agricultural activities are undertaken, mainly to supply the hotel. IDC operates Guest Houses and provides staff accommodation, a Conservation Centre and logistical support to the Island Conservation Society.

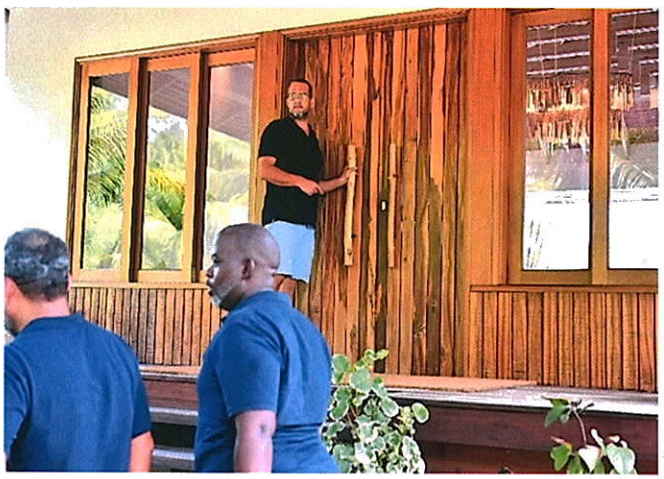

Four Seasons

With tourism being the number one economic driver of the island, Desroches is home to a branch of the **Four Seasons resorts**. The 5-star resort, with 71 high quality accommodations including bungalows, villas, suites, and residences – each with personal pool, beach access and private garden.

Solar Farm

One of the company's strategic objectives is to explore and introduce renewable energy projects on the islands to reduce reliance on fossil fuels, thus reducing operating costs.

Seychelles' Desroches island is consuming 90 percent less fuel thanks to the installation of a 2.5-megawatt solar farm commissioned by the **Islands Development Company** (IDC). The farm is the second-largest solar plant in Seychelles after the one on Ile de Romainville. The 2.5-megawatt solar farm was built by a South African-based distributed renewable energy company.

Mr Savy revealed that the expenditure for electricity had dropped to $0.19 per kilowatt, in contrast to the $0.42 when the generators were in action. The only funds that IDC expended were to construct the pillar to which the PV panels are affixed, as well as the structure that houses the equipment.

The solar farm on Desroches is the fourth and biggest installation on the outer islands managed by IDC.

Reef Balls

The islands of Desroches are currently facing the dangers of beach erosion, which could eventually bring the islands' existence in peril especially as they are coralline and low-lying islands. Various methods to tackle erosion have been used in the past with little to no effect. They found a company in the Maldives, that had adopted a technique called reef balls, that has had great results, Mr. Savy, the IDC chief Executive stated.

As part of their commitment to protecting Desroches Island, they are installing Reef Balls offshore to shelter the beach from erosion and help preserve the natural coral reef. A month-long deployment had commenced since 26 April 2023.

A reef ball is a designed artificial reef module that mimics the structure and function of a natural reef made with special concrete additives with a pH like seawater. This assures compatibility with marine environments and enhances its attractiveness to colonising organisms.

"The balls have to be placed in an exact pattern and that is why the company made a comprehensive study of the coastline before the laying works begun, as they needed to find the perfect placement and number of balls to install to ensure maximum effectiveness,

The balls not only protect the coastline but also reduce the strength of the current and waves crashing on the beach and, therefore, reduce erosion. The project to install 800 reef balls on Desroches is expected to be completed by December 2023.

ICS

The ICS Conservation Centre was established in 2009. Desroches Island Conservation Centre located in the Creole village. The main objectives are to protect the marine and terrestrial environments, to rehabilitate, monitor and research the environment, to educate staff and guests and to make sure Desroches Island is an environmental rehabilitation success through a partnership of ecotourism and conservation. ICS employed a full-time Conservation Officer and other conservation staff. Every visitor to the island is invited to call in to the Island Conservation Centre in the village to meet the staff, learn more about their work first-hand and visit the nearby Aldabra Giant Tortoise sanctuary.

Agricultural Production Research

Desroches is an agricultural research hub, where experiments are being conducted on various varieties of plants. IDC has tested a variety of crops on the island, some of which have proved to be immensely successful. The outcomes of the trials will be operationalized on Coëtivy on a much bigger scale.

The project has already started bearing fruits as IDC now supplies vegetables and free-range eggs to hotels, and demand for such products are ever-increasing from other establishments.

(IDC) says that it is still going ahead with its agriculture programme on the outer island of Coetivy despite some issues with prospective farmers.

The plan was for farmers to come to the island and start production of various agricultural products, but after some disagreements related to leasing of the land that they would farm on, there was no movement on that front.

The Islands Development Company (IDC) is making progress on several projects some of which will benefit the country at large, and others which are vital towards the company's expansion.

Thus far, trials to determine the types of vegetables better suited for production on the island have been conducted on Desroches island since it is largely like Coetivy. An Israeli company contracted to carry out the first phase are set to start the second phase, comprising the costing exercise, and finalising the technical details and elements, as well as infrastructure system for IDC to utilise to maximise production. They considered numerous elements on the island and have concluded that it is very satisfactory for large-scale agriculture, with some under shade houses, making use of tunnels or open-air agriculture," Mr Savy stated.

IDC has managed to, through the project, produce around 300 to 400 kilogrammes of tomatoes on just a few beds, during the Northwest monsoon season, when it is particularly humid and rainy.

As it aims to develop its agricultural production over 200-hectares, it will take around 5 years before IDC can reach capacity. A significant proportion of the space will also be dedicated to the production of animal feed, with crops such as corn which can be converted to animal feed for livestock and pork production.

Coetivy

Coëtivy lies 290 kilometres south of Victoria. Excluding the raised limestone islands of Aldabra and Assomption, Coëtivy is the largest coral island of Seychelles at 931 hectares. It is a long and narrow island, 9 kilometres by 0.25 to 1.6 kilometres stretching in an NNE to SSW direction. It was formed on the east side of an almost rectangular shoal rising from a depth of 2.5 kilometres and measuring about 180 sq kilometres.

Coëtivy has been dedicated primarily to agriculture and aquaculture and any future tourism development will have to co-exist. The 931-hectare island is a mere 290 km from Mahe, reachable in an hour by plane or twenty-four hours by boat, making it feasible for large scale agriculture production. IDC alone cannot develop the whole 400 hectares of land set

aside for agricultural development on Coëtivy. It has thus started to engage with the various local Farmers' Associations to invite them to form part of this programme. Discussions will intensify in that line.

In the meantime, work to clear the agricultural land of undergrowth has started. IDC itself will engage in cultivating some cash crops such as vanilla, onion, ginger, and garlic. Alongside agriculture there will also be some broilers and layers as well as livestock which will be a source of fertiliser for crops. There are also advanced plans to reintroduce some aquaculture on Coëtivy, such as shrimp, sea cucumber and sea urchin. For that, IDC will have to rehabilitate some ponds left behind by SMB. With the return of Mr. Justin Moustache to IDC as Agricultural Project Manager, this development is already showing signs of future success.

The project for agricultural development on Coetivy island is thus far advancing well, and progressing into its second phase, chief executive Glenny Savy revealed to the media last week.Plans are underway to build houses for broilers on Desroches. These will be premium semi free-range chicken which will mainly target the tourism establishments. Production on Coetivy will be on a larger scale targeting 1000 – 1300 tons of chicken annually.

Israeli Consultants: Studies which concentrated on ground water availability on Coetivy for large scale crop production is complete. Results show that underground water is abundantly available on the island for large scale agriculture. The experts also tested the soil and results show that the parameters are good for large scale production. The project is now in the surveying phase. The Israeli experts will now submit the survey results to explain the techniques that they will use to planting of crops such as onions, ginger and garlic, maize which will be used in animal feed, among others. A presentation will be made to IDC.

Broiler meat: IDC intends to produce 100 tons yearly.

Pork production: This will be done on a commercial basis.

Chicken hatchery: There will be a chicken hatchery for the day-old chicks, which IDC will need on its farm. There are also plans to introduce parent stock to cut down on imports. All chicken will be produced on the island on a high standard to guarantee the best quality and taste.

Goat and cattle production: Goats and sone cattle will be raised on the island.

Waste water: All waste water will be treated and recycled prior to its use in irrigation.

Barge: A barge will service the island on weekly/10-day basis to bring agricultural inputs to Coetivy and transport bring fresh produce to Mahé.

Local farmers: IDC will invite local farmers from the main islands to engage in agricultural activities on Coetivy and learn the techniques being used. They can then bring the know-how and technology to their farms.

Job opportunities: Job opportunities will be available for farmers on the Coetivy farm.

Agricultural School: IDC will have a school of excellence on Coetivy for practical and theoretical exposure in the agricultural field.

Prawn farm

In 2020, IDC took the decision to refurbish nine of the old SMB ponds located in the north of the Coetivy for shrimp production. IDC's intention was to revive the local prawn farming industry and to undertake the project in an environmentally and economically sustainable manner.

For the first phase of the project, only six out of the nine ponds that have been rehabilitated will be used to produce 2 species: the white shrimp (L. vannamei) and the black tiger prawn (Penaeus monodon) exclusively for the local market.

IDC is trying out a biofloc system with the ponds which entails water recycling. Hence, two ponds have been reserved as settlement ponds. The 9th pond has been earmarked as an experimental pond, but a decision is yet to be taken on the type of species that will be grown in that pond.

In December 2021, IDC started the trial period and stocked a first pond with 150,000 white shrimp post-larvae (PLs). The PLs were imported from a reputable company in Singapore. This first trial culminated in the harvest in April 2023 of 2.1 tonnes of shrimps. There were a lot of interest from the retailers, hotels, restaurants, and the public. This high demand indicates that prawn farming is a viable business.

Following the success of this low-density trial, IDC stocked a second pond with 330,000 PLs (high density) in April 2023 and is analysing the performance of this culture. The next harvest is expected in July 2023.

A shipment of 240,000 monodon PLs, was also imported from Singapore. However, given that the black tiger prawns are more susceptible to stress, there was a high rate of mortality with that consignment.

Given the challenges experienced with the monodon shipment and the cost of freight, IDC has taken the decision to renovate an old SMB hatchery located in the centre of the island to supply the farm with PLs. This project is expected to be completed before the end of 2023.

IDC intends to continue with its trials throughout 2023 and aims to achieve its full production capacity early in 2024 once its hatchery has been set up.

The old SMB processing plant is also being renovated to process the prawns on Coetivy.

IDC is self-financing the prawn project and is also exploring the possibility for future expansion of the prawn farm for exports.

3. Recommendations

The Committee recommend that the government provide crucial support to the Island Development Company (IDC) in order to enable them to pursue their various developmental projects and Strongly propose that the IDC should actively market their services and products to the local population, thereby encouraging more Seychellois to visit the islands.

The IDC plays a crucial role in the overall development and maintenance of the islands, with their initiatives consistently promoting economic growth, environmental sustainability, and the preservation of our unique natural heritage. Given the significance of their work, it is imperative that the government provide the necessary support to ensure that their projects can be carried out effectively and efficiently.

Furthermore, the committee would like to emphasize the importance of marketing the IDC's services and products to the local population. In order to encourage more Seychellois to explore and appreciate the beauty of our islands, it is essential that the IDC engages in targeted marketing campaigns tailored specifically to the domestic market. By creating awareness of the various offerings available on the islands, such as eco-tourism activities, cultural experiences, and locally-produced goods, the IDC can stimulate local interest and foster a sense of pride in our own natural treasures.

To effectively achieve this, the IDC must work in collaboration with local travel agencies, media outlets, and community leaders to spread the message of the unique experiences available on the islands. This can be accomplished through social media campaigns, informative brochures, and organizing cultural events on the islands themselves. Additionally, offering discounted rates and special packages exclusively for Seychellois citizens would significantly incentivize local visits and promote a stronger sense of ownership and connection to the islands.

REPORT ON COMMITTEE VISIT

Date: Friday 20th and Saturday 21st October 2023
Time: 1000hrs onwards
Site: Praslin and La Digue

Present

Committee on Government Assurances

Introduction

The Committee on Government Assurances, headed by its Chairperson, Hon. Sylvanne Lemiel carried out a site visit to Praslin and La Digue on Friday the 20th and Saturday the 21st of October 2023. The two days working sessions were part of the Committee's mandate of investigating the progress of projects pledged by Ministers on the floor of the house during Statements, Question Time, the Budget Address and during the delivery of the Message of the President on the State of the Nation.

The objective of such site visit was to assess the implementation and progress of various government projects and initiatives on Praslin and La Digue. The committee aimed to gather first-hand information and evaluate the extent to which these projects align with their initial promises and objectives.

Ice Plants

Assurance Codes: PO/220222/7PAR/1692-1695 given during the State of the Nation Address on the 22nd of February 2022 by the President of the Republic of Seychelles Mr. Wavel Ramkalawan

No.	Assurances	Classification & Remarks
1695	*Artisanal fishing.* Byensir nou ape donn tou bann fasilite modern. Yer ti annan 9 *plants.* Bann *ice plants.* Sa lannen pou annan 4 nouvo. E partou kot zot pase zot war. Anse Aux pins, Cascade, Grand Anse Praslin, Baie Ste Anne Praslin. Tousala bann nouvo sant, bann nouvo fasilite ki nou pe mete a dispozisyon nou bann peser.	

Praslin Island is home to a newly constructed market and other associated facilities to support the local farming and fishing communities. It was officially opened on the 1st July, 2023. Work on the R15.1 million project, funded by the European Union under the 2020-2026 Sustainable Fisheries Partnership Agreement, Sectoral Support Programme, started in November 2021 and was carried out by All Weather Builders building contractor. With the initial conceptualisation of the project in late 2017, many difficulties were faced by the Praslin Fisheries Development Committee, led by SFA. The next phase, which is expected to start in 2024, includes the construction of a seawall and installation of pontoons to enable fishers to moor their boats safely and easily land their catches.

The modern facilities, located in the heart of Baie Ste Anne, comprises a fish and vegetable market, a meat processing area for locally produced products, 12 gear stores, an ice plant, a fish landing shed, fish shop, offices, electrical rooms, and a conference room. In addition to the fish selling and ice storage facilities, the ice plant also features upstairs offices and a conference room to facilitate administrative and collaborative activities. Moreover, the facility offers an accommodation facility for staff coming from other islands on official duties.

To sell their commodities at the market, the farmers and fishermen are required to pay a daily fee of 50 Scr. The opening hours of the facility are from 7 am to 6 pm. The monthly

rental fee for the gear store is 1000sr. It was emphasized during the visit that both fishermen and farmers are responsible for the clean-up of the premises to maintain a clean and organized environment.

The ice plant has a capacity of 5 tons and offers varying payment rates based on the quantity of ice required. For instance, customers can purchase 25kg of ice for Rs 15 with a concession, while a 50kg bag of ice costs Rs 30. To ensure the safety and well-being of the individuals accessing the ice plant, the Seychelles Fishing Authority (SFA) provides protective gear to fishermen. However, during the visit, concerns were raised regarding the current capacity of the ice storage. The stakeholders expressed the need for an extension in the near future to ensure an adequate supply of ice.

In conclusion, the committee observed that the ice plant in Baie Ste Anne, Praslin provides an important infrastructure While the current facilities are functional, there is a recognized need for expanding the ice storage capacity to meet the growing demand in the future.

MATT CLINIC - Anse Kerlan Praslin

Codes: MH/281122/7PAR/1765- 1769 GIVEN BY THE MINISTRY OF HEALTH MINISTER PEGGY VIDOT ON THE 28TH NOVEMBER, 2022

1767	**PS BERNARD VALENTIN** Prezan i annan sa *sorry* i annan *MAT clinic, MAT clinic* kot nou donn servis *right now.* Donk letan nou ti pe fer Bidze nou ti annan plan pou *renovate* sa *MAT clinic.* Akoz sa *MAT clinic* i bezwen renovasyon me sa *MAT clinic* i vre ki i, i en en lot Minister ki'n sed nou sa plas pou nou servi la e nou pe servi la nou. Me selman depi ler ki nou'n fer sa, sa Bidze keksoz in en pe evolye. In evolye dan lesans ki la aprezan, nou an diskisyon for avek en partner etranze, pou nou fer en sant o bor sa *MAT clinic* zis lot kote semen. E sa sant Minis in dir dan son ladres lo konmansman e sa sant pou fer travay ki sa *MAT clinic* pou fer. Donk nou, nou, nou refleksyon se ki si sa i leka e si sa i arive sa lannen posibleman nou pa pou bezwen fer sa gro renovasyon lo aktyel *MAT clinic.* Me selman nou kapab servi sa larzan petet avek, avek lakor Minister Finans, pou nou fer sa travay Anse Boudin ki nou bezwen fer. Vwala plizoumwen Mr Speaker	

The clinic primarily offers counseling and other services for clients dealing with drug addiction.

Facilities: During the site visit, it was observed that the clinic's facilities are quite limited in terms of space. The program manager and three counselors share a small room, which is mainly used for report writing due to the space constraints. Unfortunately, this limited space means that they are unable to attend to clients in this room. They currently serves approximately 230 clients on Praslin and 70 clients on La Digue.

The clinic operates every day from 7 am till late afternoon, providing the dispensation of methadone at three different sites.

Need for Rehabilitation Center: During the site visit, it became evident that there is a pressing need for a well-equipped rehabilitation center on Praslin. As the clinic is still relatively new, it is currently unable to provide comprehensive rehabilitation services to clients. This is a significant gap in the services, which could be addressed by establishing a dedicated rehabilitation center.

Proposal for a Day Hospital: The programme Manager state that in addition to the need for a rehabilitation center, there is also a proposal for the establishment of a day hospital. This would serve as an intermediate stage between the clinic and the rehabilitation center, providing more intensive treatment and support during the recovery process. A day hospital would enhance the clinic's ability to cater to the needs of clients daily.

The committee was also informed that Recovery Rate is Approximately 10% of clients have achieved successful recovery at MATT CLINIC. While this figure may seem low, it is important to acknowledge that addiction recovery is a complex and challenging process. Nevertheless, efforts should be made to improve this rate through the implementation of more comprehensive services and support networks.

Visiting Doctor: Once a month, a doctor visits Praslin for three days. During this period, the doctor consults with clients from Praslin at the Baie Ste Anne hospital. Additionally, one day is dedicated to consulting with clients from La Digue. While this arrangement helps in providing medical attention to the clients, there is still a need for more frequent doctor visits to ensure timely and adequate care.

Conclusion: The site visit to MATT CLINIC at Anse Kerlan provided valuable insights into the services offered and the challenges faced by the clinic. The limited space and absence of a rehabilitation center were identified as prominent issues that need to be addressed. It is recommended that these concerns be addressed through the establishment of a well-equipped rehabilitation center and the proposal for a day hospital. By improving the facilities and expanding the range of services, MATT CLINIC can enhance its ability to support clients in their recovery journey.

Youth offenders centre

Codes: MIA/181122/7PAR/1853-1857 GIVEN BY THE SEYCHELLES PRISON SERVICES (ASP) MINISTER ERROL FONSEKA 18TH NOVEMBER, 2022

No.	Assurances	Classification & Remarks
1854	**COMMISSIONER OF PRISON RAYMOND ST ANGE** Sa en proze enteresan e enportan nou Nasyon, pou tou dimoun, pou pep, pou kominote, pou fanmir. Pou konnen ki malerezman nou annan en problenm ase mazer lo *delinquency* avek serten dimoun serten marmay. E mon krwar sa i en travay nou tou ansanm. En lekip nasyonal sa. *So* nouvo fasilite, *actually* i pa en nouvo fasilite parey ou konnen. I en fasilite ki *located* Amitie Praslin. E sa larzan *tender* avek diskisyon ki nou annan avek *SIA, Infrastructure Agency,* pou komans nenport ler la. Nou annan en depans R800mil la ki pe arive dan Bidze aktyel ki pou fer travay komanse. E larestan travay ler keksoz i bouz an avan la, pou termin *first quarter next year.* I en plan ase agresiv akoz nou pa kapab tarde lo la.	

The committee conducted site visit to the Youth Offenders Centre, where they were greeted by Commissioner of Prison Mr. St. Ange and the Principal Ms. Elsa. The purpose of the visit was to assess the progress of the project and gather information about its current state.

The project was reported to be 96% completed, with only the installation of security devices and other minor facilities remaining. This final phase is scheduled to be completed by November 2023.

The facility is designed to accommodate juvenile offenders aged 14-17 years old, with a total capacity for 20 males and 12 females. The centre features four classrooms for educational purposes, a sports activity yard, a dining hall, a storage area, and staff facilities. During the site visit, the committee observed that the male and female facilities were separate, with appropriate accommodations for each gender.

Currently, the center is in the pre-commissioning phase of recruiting staff. It was highlighted that they are working closely with the social affairs department to ensure that appropriate personnel are hired.

It was also noted that two officers from the facility had recently undergone training in Israel, which suggests a commitment to improving the knowledge and skills of the staff. The facility's operations will include morning and afternoon sessions, with mid-day sessions dedicated to classes and leisure activities in the afternoons. Additionally, specific subjects will be introduced to cater to the educational needs of the juvenile offenders.

Furthermore, the facility plans to engage the community in its programs for offenders. This community engagement program aims to provide partial work opportunities for the offenders, similar to the Technical and Vocational Education and Training (TIVET) program. This approach will enable the juvenile offenders to develop vocational skills and receive education that will facilitate their reintegration into society upon their release.

On the whole, the committee found themselves greatly impressed with the advancements made and the future strategies outlined for the Youth Offenders Centre. The facility's separation by gender, educational facilities, and focus on vocational training and community engagement indicate a comprehensive approach to rehabilitating juvenile offenders. The recruitment of appropriate staff will be crucial to the center's effectiveness in addressing youth crime and facilitating the rehabilitation and reintegration of the offenders. The site visit to the Youth Offenders Centre provided the committee on government assurances with valuable insights into the progress and plans for the facility.

DORMITORY STADIUM AMITIE

Codes: MYSFA/161122/7PAR/1833-1844 GIVEN BY THE MINISTRY OF YOUTH, SPORT & FAMILY MINISTER MARIE-CELINE ZIALOR 16TH NOVEMBER, 2022

Appropriation Bill

No.	Assurances	Classification & Remarks
1837	**DG GYRA NIBOURETTE** Onorab pou ou stad Amitie, Praslin, nou ti annan en *meeting* avek Federasyon Foutbol kot ti apepre en 2 semenn pase, kot Federasyon nou'n zwenn ansanm avek zot. Akoz parey nou konnen poudir sa stad foutbol ki servi li, me selman nou konsyan poudir i annan bann atlet osi ki fer atletik ki servi e son leta ki mannyer i ete i pa pou apropriye pou zot. *So,* Federasyon Foutbol nou an diskisyon pou zot *renovate* laplenn e *from there* apre pou nou kapab aziste stad ki mannyer i ete. Me selman i depan ki grander i ete pou nou kapab met *track.* *So,* i annan en legzersis ki deza pe ganny fer pou stad Amitie. I pou annan son renovasyon dormitwar osi tou en sel. *So,* nou annan en plan avek federasyon foutbol lo stad Amitie. Mersi.	

A site visit was scheduled to see the Dormitory at the Stadium Amitie. The purpose of the visit was to assess the current conditions of the dormitory and gather information regarding any renovation or maintenance work done.

On the site, Ms. Nadine Finesse, the principal sport officer, was present to provide information and guide us through the facilities. She informed that no renovation had been done so far on the dormitory.

However, she informed the committee that some renovations have taken place, specifically in the toilet facilities. The toilet sets have been renovated or replaced.

She also mentioned that the dormitory is currently being used by the St. Louis Football club, preventing the committee from visiting the facility.

Unfortunately, no further information could be provided during the site visit due to the occupancy of the dormitory.

AGRICULTURAL STORE

Codes: MACCE/231122/7PAR/1731-1757 GIVEN BY THE MINISTRY FOR AGRICULTURE, CLIMATE CHANGE AND ENVIRONMENT MINISTER FLAVIEN JOUBERT 23RD NOVEMBER, 2022

Akoz nou okouran programm sityasyon *livestock* lo Praslin.	

The committee visited the agriculture store located at Amitie. The purpose of the visit was to assess the store's current condition and explore any upcoming projects or developments. The store primarily caters to farmers in the local area, providing them with a range of agricultural supplies such as seeds, fertilizers, irrigation devices, and various farming materials.

One significant observation during the site visit was the lack of renovation or updates to the premises. The store appeared to have not undergone any significant changes for quite some time. This may have an impact on the overall shopping experience for customers and hinder the store's ability to display and organize the products effectively.

However, there was an upcoming project in the pipeline which is to install air conditioning for the storage facilities. This development is expected to improve the quality and condition of the stored products, ensuring their longevity and effectiveness. It will also create a more comfortable working environment for employees.

Considering the range of supplies the store offers, it is evident that it aims to meet the various needs of farmers. The store stocks a wide variety of seeds, fertilizers, irrigation devices, and farming materials to cater to the different requirements of farmers in the area. This comprehensive selection enables farmers to find the necessary supplies for their specific agricultural practices conveniently.

One particular issue highlighted during the visit was the lack of space within the premises. The current space is insufficient to accommodate the growing range of products and adequately display them for customer convenience. To address this concern, it is recommended that the store considers expanding or reorganizing its layout to create a more spacious and organized shopping environment.

An interesting future development mentioned by the senior store officer, Mr. Eddy Aglae, was the plan to open a small outlet on the nearby island of La Digue. This expansion aims to reach out to farmers in that area who may not have easy access to the main store location. The new outlet would provide convenience and accessibility to

farmers on La Digue, enabling them to access the agriculture store's range of products and services without having to travel long distances.

Overall, the site visit to the agriculture store provided valuable insights into the current state of the premises and potential areas for improvement. With upcoming projects such as the installation of air conditioning and plans to open a new outlet, the store demonstrates a commitment to enhancing its services and better serving the agricultural community. Though, it is recommended that the store addresses the need for renovation and considers expanding or reorganizing its space to meet the growing demand and create a more spacious shopping environment.

Visit to La Digue

Port

Codes: SONA/260219/6PAR/1-10 GIVEN BY THE PRESIDENT OF THE REPUBLIC, MR. DANNY FAURE 26TH FEBRUARY, 2019

Si tou ketsoz i al parey in ganny planifye, proze i ekpekte konplete ver lannen 2023.	

Mr Franky Laporte from The Seychelles Port Authority, provided a guided tour of the port and explained the different aspects of the project. He mentioned that the extension and construction of the port had been completed and that it started in 2019. The engineer completed their work in June 2020, resulting in a port with a length of 126 meters and a ramp of 30 meters. The depth of the port is 3.5 meters.

One notable highlight Mr Laporte mentioned was the high mobilization cost associated with the project. This indicates that significant resources were required to bring the necessary materials and equipment to the site and to set up the construction operations.

Currently, Phase 2 of the project is underway. The port is being further fortified with the enlargement of rock armoring, which will provide additional protection and stability. Additionally, a platoon has been placed on the site to carry out this phase of the project.

After the completion of the port extension and construction, the next project in line is the construction of a passenger terminal. A call for appeal has been launched for architectural designs related to this terminal. The aim is to separate the cargo and passenger terminals, with each being located on one side of the port. This separation will likely improve the efficiency and organization of port operations.

During the tour, it was also mentioned that the existing embarkation port will be used for other facilities once the new terminals are in place. It was not specified what these facilities would be, but it indicates that the port authorities are planning to make use of the existing infrastructure for other purposes.

Furthermore, Mr Laporte highlighted that the storage building in the cargo terminal will be used exclusively for commodities in transit and not for long-term storage. This suggests that the storage building will serve as a temporary holding area for goods that are in the process of being transported, rather than a long-term storage facility.

Additionally, it was emphasized that security measures are in place to ensure the smooth operation and daily movements within the port. This indicates that the port authorities have taken measures to protect the port's assets, personnel, and activities from security threats.

Overall, the site visit at the PORT on La Digue provided insights into the completed extension and construction of the port, as well as the ongoing and future projects. The information provided by Mr. Laporte shed light on the timeline, separate cargo and passenger terminals, and the future utilization of the existing facilities. It also highlighted the importance of security measures in the efficient functioning of the port.

St Mary's Hospital La Digue

Codes: PO/220222/7PAR/1692-1695 GIVEN BY THE PRESIDENT OF THE REPUBLIC OF SEYCHELLES MR WAVEL RAMKALAWAN 22ND FEBRUARY, 2022

State of Nation Address

No.	Assurances	Classification & Remarks
1694	La Digue, mobilizasyon in fini komans fer. Sa semenn oubyen semenn prosenn Lopital La Digue i komanse. E nou espere ki poudir avan lafen sa lannen, nou ava kapab fer omwen en *soft opening* sa Lopital. E Onorab, mon anvi ki ou anmenn sa mesaz La Digue. Lopital La Digue pou ganny konstri, e i pou ganny fer sa lannen!	***honoured***

The newly constructed **St. Mary's Hospital** on Seychelles' La Digue Island is expected to be operational by Monday 23rd October 2023. The Committee made the visit to observe and analyze the facilities and services offered to be by the hospital. The management of the hospital has emphasized the importance of booking appointments to ensure smooth operations. The chief Executive Officer of Health Services Dr. Danny Louange, Ms. Maria Cousin, the Nurse in charge, guided the committee throughout the visit and provided valuable insights into the hospital's operations.

It is worth noting that this project is a donation of $4 million from the UAE government and an extra SCR 2 million ($139,000) from the La Digue Hospital Fund, the construction of the new La Digue hospital was made possible.

Overall, the visit to St. Mary's Hospital revealed that the management has put in place all necessary systems for smooth operations. The electronic registration system is fully functional, and people are encouraged to book appointments to facilitate efficiency.

The hospital is equipped with various facilities to cater to different medical needs. The physiotherapy room is equipped with the latest devices and machines, ensuring patients receive top-notch treatment. The recovery room and operating theater are also available for surgical procedures.

However, it was noted that the labor room will only be fully functional next year, indicating that expectant mothers may need to seek alternative options for the time being.

The patient ward consists of maternity, female, male, and children's wards, providing specialized care for patients of different genders and ages. The consultation room is available for doctors to analyze and diagnose patients, while the records room ensures efficient documentation of medical history.

The hospital also has a specialized treatments room and a pharmacy dispensary to provide specific medical treatments and dispense prescription medications.

For oral health, a dental clinic is available to cater to patients' dental needs. Additionally, an isolation room is present to isolate patients with contagious diseases, ensuring the safety of others within the hospital. A separate critical cases room and isolation/private room are also available to provide specialized care for critical and isolated patients.

To support diagnostic procedures, the hospital has a laboratory, ultrasound room, and an X-ray room. These facilities allow for accurate diagnoses and monitoring of patients' conditions.

Other essential facilities on-site include an oxygen plant to provide necessary oxygen supply, an incinerator room for the safe disposal of medical waste, and a mortuary to handle deceased patients respectfully.

The visit to St. Mary's Hospital showcased the commitment to provide comprehensive healthcare services to the community.

Conclusion

Overall, the committee was satisfied with the implementation of projects based on Assurances given in the National Assembly. Committee will follow up on assurance for Dormitory at the Amitie Stadium. MYSFA/161122/7PAR/1833-1844
